Putting Tobacco in Tins is Like "Locking the Stable Door" — "After the Horse is Gone"

Real tobacco flavor depends upon the leaf being preserved in its natural state, possible only by pressing the leaves into plug form and keeping it in by covering it with a natural leaf wrapper. The natural flavor and strength of tobacco escape when cut or granulated. Take a Plug of Sickle that is even thoroughly dried out so that when you whittle it off it crumbles into dust, but it will burn and smoke smooth and cool as it has all of its original tobacco flavor preserved, unevaporated in Plug Form. Whittling a pipeful is little trouble, amply repaid by both quality and quantity. Try this experiment and judge for yourself.

Goodyear Fortified Tires

Cost Users \$5,000,000 Less

Our last price reduction—made February 1st—will save Goodyear users about five million dollars this year. And that was our third reduction in two years, totaling 45 per cent.
Yet Note This
Yet Goodyear Fortified Tires embody many extras. Five are costly features found in no other tire. The rest are found in few. If we omitted those extras, we could save on this year's probable output \$1,635,000. We could add that to our profits, yet Goodyear tires would look as good as now.
This year's improvements alone will cost us \$500,000 this year. All to give you extra wear. And we shall spend \$100,000 on research this year to find more improvements still.
They Are Yours
These extras belong to you. They mean less rim-cuts, less blowouts, less loose treads. They mean more rubber, more fabric, more mileage, less trouble. Most tire users know that, so Goodyear tires far outlast any other. Prove it yourself this summer. It will bring you tire contentment.
Any dealer, if you ask him, will supply you Goodyear tires. Men are now adopting Goodyear tires faster than we can supply them. We have never seen anything like it.

Regarding Coos County New Hampshire

Judge O. A. Towne of the Journal-Transcript, Franklin Falls, N. H. has this to say of the North County of that state and as we can vouch for the truth of it we give it space.
Within the last few years Coos county, N. H. has expended \$250,000.00 for new school houses, \$1,250,000.00 for support of schools, and a like sum for improvement of roads. The statement is made that there is not a vacant church in the county. There are nine approved high schools, four with the college entrance privilege. In the last 14 years the little town of Stratford has sent fifty per cent of its high school graduates to schools of its high school graduates to schools of higher education. Lancaster, with about 2,500 population has a high school building which has cost upwards of \$65,000.00 and is not second to any in much larger places in arrangement and modern equipment. The schools of Berlin and Colebrook are too well known to need comment. They have been leaders in the state for years.

What about business? The Rambler has seen no such farms in the southern part of the state or in Massachusetts as are here to be seen. One farm of 600 acres, cuts 300 tons of hay. The owner, who is in Franklin, N. H., and in many instances looking much better. The hay crop is an eye opener to one who is accustomed to the short grass in many of the hay fields, where this year especially, it is almost necessary to stick up a stick in order to know where the machine has been run. While riding in the automobile of W. E. Bullard, (who by the way is engaged in the hardware business, conducting coal and wood yards and does farming on the side), the Rambler remarked the shortage of the hay crop in Franklin. "Would you like to see some good grass?" asked Mr. Bullard. "I certainly should," was the reply. Then the machine was headed for a hundred acre field it was not left at the gate, but went into and over the field, where last year the crop was two and six-tenths tons per acre. Two hundred and sixty tons of good hay from 100 acres is a crop that would make farmers in other parts of the state smile with contentment.

Mr. Bullard owns one hundred acres, but the field contains, so the Rambler would judge, about 250 acres, the rest being owned by other parties, and all first class land for hay or farm crops. The land owned by Mr. Brown is of like character, and through his field the Rambler was carried in an automobile. It recalled vividly his early days on the farm and suggested the great improvements which have been made in farm machinery as well as in other industries. In the town of Colebrook about every farmer owns an automobile, and uses the same for business and pleasure. The houses and barns are well painted and the surroundings of nearly all the farm homes are attractive. The Rambler spent two days and saw much of the county, and he failed to see signs of the awful conditions recently reported by one who claimed to have made an investigation of conditions in the North Country. Probably there are some homes where conditions are not ideal, or even what they should be. But as bad or worse can be found in every town or city, and in proportion to the number of inhabitants there are more cases of destitution in the more thickly settled portions of the state than can be found in Coos county.

A Pickerel Story
A number of years ago, to be exact, it was July 4, 1901, Fred Sanderson, proprietor of the Onondia River House, was sitting on the veranda of his hostelry with several other men. At the time large catches of pike and pickerel were being made at fishing holes being made at the high banks, decided that after dinner he would try his luck. At 3 o'clock he and an oarsman entered a row boat and went to the banks. According to the oarsman Mr. Sanderson's spoon was playing near driftwood when it was seized and almost in an instant 100 feet of line were unreeled. Mr. Sanderson avers that he played with the fish 40 minutes before it showed signs of exhaustion then it was slowly walked toward the boat and a landing net placed the pickerel in the boat.

The fish being large the men quit fishing and came home. The pickerel was placed on the meat market scales and weighed 32 pounds. The fish was photographed and exhibited at his hotel.

RESOLUTIONS OF RESPECT.

Whereas our Heavenly Father has in His infinite wisdom called from our midst our loved and respected sister, Gertrude Perry, and while we deplore her loss and shall for so long time miss her cheerful and happy smile, the relation held with her, a charter member of our Grange makes it fitting that we record our appreciation of her.

Resolved that the removal of such a life from our midst leaves a vacancy that will be deeply realized by all the members of this order and will prove a great loss to the community in which she lived, a loss that time alone can soften the grief thereof.

Resolved that through personal devotion to our order unflinching throughout her life she has left us a sacred legacy. That Sweden Grange No. 184 will greatly miss her familiar presence at all of its meetings. This being but a partial tribute to the memory of our departed sister.

Resolved that this heartfelt testimonial of our sympathy and sorrow be spread upon our records, a copy sent to the Norway Advertiser for publication and a copy forwarded to the family of our departed sister.

A part of Mr. Cole's furniture was stored in the barn awaiting removal and was burned. So far as can be learned there was no insurance held by either Mr. Bell or Mr. Cole.

GET RID OF HUMORS AND AVOID SICKNESS

Humors in the blood cause internal derangements that affect the whole system, as well as pimples, boils and other eruptions, and are responsible for the readiness with which many people contract disease.

For forty years Hood's Sarsaparilla has been more successful than any other medicine in expelling humors and removing their inward and outward effects. Get Hood's. No other medicine acts like it.

How, and Why, —the GOODRICH "Fair-List" Propaganda now saves Car-Owners, yearly, over \$25,000,000 on Tires

THERE are 1,923,951 Automobiles now State-
licensed, and running, in the United States.
Of these, 1,803,951 are Pleasure Cars—i.e.,
exclusive of Trucks, etc.
More than 90% of them, or about 1,623,555, use Pneu-
matic Tires.
Each car will wear out and replace, on average, about
one set of Four Tires per year.
Therefore, the interests of each Car-Owner as well as
each Car-Manufacturer, each Car-Dealer, and Salesman, is
vital and personally affected by the price of Tires to Con-
sumers.

Because, Tires and Gasoline are the two big items of
consumption in the operation of Motor Cars.

The Owner who used his Car 1,000 Miles less per year,
than he would have done, because of "the high-price of Tires
and Gasoline," received that much less return from his entire
investment in the Car proper.

The potential, or prospective, Car-Owner who fails to
buy a Car because of "the high cost of Tires and Gasoline,"—
he who sells his Car and does not buy again because of, "the
high cost of Tires and Gasoline"—or he who, for the same
reason, stores his Car and does not run it during a considerable
part of the year, is a direct loss to

- 1st—Automobile Manufacturers, as a class.
- 2d—Automobile Dealers, as a class.
- 3d—Garage Owners, as a class.
- 4th—Lubrication & Gasoline Manufacturers, as a class.

But,—he is a greater loss to TIRE Manufacturers, and
Dealers, as a class, than to any others.

Because,—
—Gasoline and Lubricants, for instance, can be sold to
the Owners of Motor Boats, Stationary, and other Motors.

But,—Automobile Tires can only be sold, in the ultimate,
to the man who OWNS a Car, and who wears out Tires through
ing it.

So this, then, is a leading
reason why WE initiated, and
propagated, that Goodrich "Fair-
List" Movement which we pub-
licly announced in the press on
Jan. 31, 1915, and which caused
practically every Pneumatic Tire
Manufacturer in this Country to
follow our lead and bring his
prices down to a fairer level.

THIS is also the reason
why some Tire Manu-
facturers, who could
not, or would not, "meet" our
BASIC prices for Pneumatic
Tires (even though our "Fair-
List" Propaganda obliged them
to make heavy reductions off
their former Lists) might errone-
ously suppose that "Goodrich"
Tires have been cheapened in
Quality, as well as in price.

Hence this explanation (to
the Public, to Car-Manufacturers,
Dealers, Car-Salesmen, Carages,
and Tire Dealers generally) that
we deem it "good business" to
sell the best Goodrich Tires (of fabric construction) we have
ever made, at the fairest price possible for such quality.

Hence, too, the following TEST offer to Consumers.

We will cheerfully pay for any Goodrich Safety
"Non-Skid" Tire, sold since our "Fair-List" price-reduction
(announced on January 31, 1915), which when cut open shows
any reduction in quality, in number of layers of Canvas, in
thickness, or quality of Rubber, when compared with any
other Goodrich Safety "Non-Skid" made by us, and sold at
our higher prices current before the Goodrich "Fair-List"
Movement.

And,—this is further to authorize any Tire-User to
extend this Offer (at our expense) to any Tire Dealer, or Manu-
facturer.

We ask Car-Owners, and Tire Consumers, in their own
interest, to see that no "implication" of lowered quality in
Goodrich Tires goes unchallenged—just as we have protected
their interests, for our own sake, through our "Fair-List"
Propaganda.

BECAUSE of that GOODRICH "Fair-List" Propa-
ganda, every Car-Owner who now buys any make
of Tire sized 37 x 5, now saves on each set of 4
Tires, an average of about \$46.27.

—Every Car-Owner who uses 34 x 4 Tires, of any
make, now saves, through the Goodrich "Fair-List" Propaganda
an average of about \$26.15 per Set of 4 Tires.

Made as always—
—The same reliable Construction.
—The same dependable Service.
—Nothing whatever taken out of
materials or Quality, no matter
what reductions in List-Price are
ever made.

—Every Car-Owner who uses 30 x 3 3/4 Tires, now saves,
through the Goodrich "Fair-List" Propaganda, an average of
about \$14.70 per Set of 4 Tires.

Other sizes in proportion.
The 1,623,555 State-licensed Car-Owners who use
Pneumatic Tires now save about 20% of what they last year
paid for ANY make and size, whether they be Goodrich or
competing brands,—equal to more than \$25,000,000 per year.

And, don't forget that this giant saving to Car-Owners
was never mentioned to the Public by other Tire Manufac-
turing Concerns until the Goodrich "Fair-List" Propaganda made
it imperative that they extend the Saving to Consumers on
their Tires, or lose business to the Goodrich Co.

But, notwithstanding all this,—the fact which should
loom largest to TIRE-USERS is the contrast of 10% to 40%
in prices, that still exists between the low price of the best
Non-Skid Tires (of fabric construction) that money can buy,
or the largest Rubber Factory in the World produce,—(to wit,
GOODRICH Non-Skid Tires) and all other "responsible"
Tires in the field.

Compare prices and see!
Then, if you are not already a Goodrich User, do your-
self (and us), the justice to buy at least one GOODRICH
"Non-Skid" Tire.

Test that out for Quality, Mileage and Resilience against
any other Tire, at any price, which you are now using.

The result of such Test will cause you to wonder why
you ever paid more for Maximum Quality, Mileage, and
Resilience than the Basic price of Goodrich Non-Skid Tires?
